Distribution Nest Excluders

The RGNS-36 and RGNS-48 Nest Diverter were designed to prevent raptors, ravens and other birds from building nests over double cross-arm distribution structures. The RGNS-36 is designed for 8 foot cross-arms and the RGNS-48 should be used on 10 foot cross-arms.

Specifications

- UV resistant poly material
- Color: Brown
- Galvanized Steel or Stainless Steel hardware
- All hardware for installation included
- Pre-drilled holes for installation
- Optional relief cut for mating to pole
- Can be overlapped for longer arms
